

Health and Safety – Risk register

All of your Current Risks can be found here on your Risk register.

The way your Risk register displays various Risks can be altered by choosing a different option in the dropdown menu

The headings along the top strip are explained below.

	Description	Category	
	Falling or driving into tomos or holes	Slips, trips and falls	» Falling or driving into tomos or holes

If you have loaded an image for this particular Risk it will display here.

This is the main category for the Risk. When creating the Risk there is the option of using a pre-set Risk or creating a Risk that is more relevant to the situation.

This is the Risk description entered when creating the Risk. This area is the customised description that is based around the risk you have added.

Arrows denoting the Sub-category

This is the Risk sub category. As with the main category there are drop down options when setting up the Risk with the option of adding multiple sub categories to better reflect the Risk description.

When setting up the Risk there is a dropdown menu offering options around the ultimate objective for that Risk.

- Eliminate
- Eliminate**
- Isolate
- Minimise

Risk score measures the severity of the risk with the minimum being 1x1=2 and the maximum 5x5=25

If you have multiple farm units the unit location will display in here.

If the Risk has been formally reviewed and the date box populated then this column will display that review date

Objective	Potential Harm	Risk Score	Location	Date Identified	Identified By	Date Reviewed
Minimise	Serious harm	8		Dec 01 2016	Imran Raza	

When setting up the Risk there is a dropdown menu offering options around how serious the harm level may be for that Risk.

- 1: First aid
- 1: First aid**
- 2: Doctor's visit
- 3: Time off work
- 4: Serious harm
- 5: Fatality

This is the date that the Risk was first identified and written up in the Risk register

The name of the Team member who entered the Risk will display in here.

The Risk can only be closed if it was set up to be able to be eliminated.

- Eliminate
- Eliminate**
- Isolate
- Minimise

The Risk can be deleted by clicking on the However the risk can't be deleted if that risk has been identified in an Induction to off Farm visitors

Closed	Actions	Complete	Incomplete	Control Actions	
-	2	1	1	1. Raise awareness with warning signs 2. Fence off dangerous holes or tomos (completed)	<input type="checkbox"/>

These relate to the number of Actions that have been created, completed and incomplete

- Actions**
- Complete**
- Incomplete**

This column lists the Actions and displays those actions which have been completed
